Conical Retention and Digital Workflow

Hands on Training From Concept to Production

Saturday, 18th April 2026

Powered by MediMatch

The Promise

Plan faster, place with confidence, and deliver predictable aesthetics from single units to full arch cases.

Who This Is For

Implant dentists and general dental practitioners who want a tighter and more reliable digital workflow.

You Will Be Able To

- Create excellent emergence profiles that support soft tissue aesthetics
- Plan digitally with the end in mind and execute guided surgery with confidence
- Restore predictably using conical retention from single crowns to full arch cases

Hands On Highlights

- Digital planning with Archiplan and RealGuide
- Surgical guide design and fabrication
- Guided surgery for immediate and delayed placement
- Abutment selection scanning and conical retention workflows
