Sebastiano Andreana

The PRAMA Implant, clinical experience and biological advances.

SPEAKER'S BIO

Sebastiano Andreana

Dr. Sebastiano (Seb) Andreana is Clinical Professor and Interim Chair of the Ashman Department of Periodontology at NYU and Director of the Center for Implant Dentistry at the same Institution. Prior, he was Professor and Chief Executive Director of the Implant Dentistry Center at the University at Buffalo, School of Dental Medicine. He also served as Director of the University at Buffalo Implant Study Club. Previously, was Professor at Loma Linda University, Department of Periodontology. He graduated in Dentistry from the University of Roma La Sapienza School of Dentistry and obtained a Master in Sciences at the University at Buffalo. From 1990 – 2005 he worked as chief Investigator at the Periodontal Disease Research Center and at the Center for Dental Studies, University at Buffalo. He was Manager of the Applied Testing Center of Ivoclar Vivadent Inc., Senior manager of Research and Development at the Microbiology Oral Care Division of Pfizer Consumer Healthcare and Senior Manager and Head of the Oral Care Microbiology Research and Development of Johnson and Johnson Co. He is Senior Associate Editor of the Journal of Periodontology, a reviewer for several scholar journals in the field of Implantology and Periodontology. Recipient of several awards , including from the Academy of Laser Dentistry and American Academy of Implant Dentistry.

ABSTRACT

The presentation will focus on the clinical use of PRAMA Implants, and its specific biological characteristics. PRAMA Implants have been on the market for over a decade, and the particular neck design has indicated that ABL (Annual Bone Loss) and Soft tissue stability and evaluation with the Pink Score are reliable and stable. Recent review articles have shown retrospective data up to six years, showing clinical stability and mostly, minimizing clinical challenges seen with conventional implant and restorative dentistry. The seminar will show some clinical cases, and the biological principles, based on current scientific knowledge.

YOUR PARTNER IN AESTHETIC EXCELLENCE.

EDUCATIONAL OBJECTIVES

At the conclusion of this course, participants should be able to:

- Identify key stages in the implant prosthetic workflow that impact treatment success.
- Apply strategies to improve communication between surgical and restorative teams.
- Evaluate common challenges in implant cases and implement solutions to improve outcomes.
- Integrate workflow optimizations into daily clinical practice.
