## ABSTRACT

This is one day course which aims to provide a comprehensive range of skills and techniques that will enable you and your team to promote the use of implants in your practice and confidently restore them.

This blended learning course will include lectures, hands on practical learning and discussions groups. Delegate case studies and a treatment planning are invited to discuss on the day to assist clinicians to make the right decision.

The course is also aimed to nurses team where they will receive a full on training to help and assist their dentists. We encourage every clinician to bring in one nurse with them.

### Lectures and discussion topics will include:

- Treatment planning
- Imaging techniques
- Dental Implant components

- Impression taking for single and multiple units
- Designing the prosthesis
- Fitting implant restorations
- Difficulties encountered and how to solve them
- Avoiding and managing implant and restorative failure
- Maintaining your implant patients
- Delegate case studies presentation and treatment planning clinics
- Digital workflow in implant restorations

**We will focus on the Sweden & Martina Implant family, but the course is applicable to clinicians working with any system. 6 verifiable CPD will be awarded.**

Nurses will be trained how to set up, understand all implant components, preparation for the restorative stage, maintenance of implant equipments. Lab docket prescribing, and more.
